## **DETAILED ACTION**

### ***Information Disclosure Statement***

1. Applicant's prior art citation filed September 18, 2000 has been received, considered and placed of record.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kurland et al. (U.S. Patent No. 4,553,222).

As per claim 1, Kurland et al. disclose a method of providing automated checkout by a guest comprising a mean to display for review on a guest terminal a listing of charges to a guest's account, a mean to perform a checkout of the guest based upon the listing of charges in response to a selection made by the guest at the guest terminal, and a mean to send a receipt electronically to a destination provided by the guest which includes a checkout receipt for the listing of charges (abstract).

As per claims 2 and 3, Kurland et al. also teach a receipt of which includes date information, and charges information of the facility (see Figure 5). Kurland et al. have all the features of the invention but not explicitly mention lodging facility location;

Art Unit: 3628

however, Kurland et al. teach a mean for printing a receipt for customers at a restaurant. Therefore, it would have been obvious to one having ordinary skills in the art at the time the invention was made to modify the teachings of Kurland et al. to have a mean to disclose the location of the facility i.e. restaurant, lodging and etc. (for example, Burger King, 123 King street, Arlington, VA 22202) so that customers can have full detailed information regarding their expenses.

3. Claims 4 and 5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kurland et al. in view of Pepe et al. (U.S. Patent No. 5,742,905).

Kurland et al. teach a communication network having multiple terminals, a central computer, a printer and etc. (see Figure 1). Kurland et al. fail to teach an email system and a fax connected to the system. Pepe et al. teach an email system and a fax connected to the network (see Figure 3). It would have been obvious to one having ordinary skills in the art at the time the invention was made to modify the teachings of Kurland et al. and combine with Pepe et al. to have a system that includes an email system and a fax connected to the network to receive and transmit information among the terminals.

### ***Conclusion***

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Mann et al. and Iwashita are cited of general interest.
